

## ***'Lead by Example'***

The Carepoint Practice is staffed by dedicated, hardworking clinicians and administrators endeavouring to provide you and your family with a complete healthcare service. We offer a modern facility for the growing needs of our community, and work dynamically to deliver care that is specifically tailored to manage your health needs on-the-go.

We have a fantastic triage system whereby all your queries are assessed with a GP to ensure you received the best advise. We also give secure online access to patients to request appointment through our online triage system, request medication and access personal health records conveniently online.

We provide all general medical services as well as a range of further enhanced services to meet the needs of all patients including children, less able bodied individuals, patients of working age, patients suffering with chronic diseases and older patients.

### **Carepoint Practice Is Part of the North Connect PCN**

North Connect is a consortium of 6 GP practices in north Hillingdon working together to provide greater access to excellent care for patients by providing services closer to a patient's home and where possible, outside of a hospital setting. We have a patient-centred approach to care, with emphasis on patients being proactive in managing their health with support from health-care providers, pharmacies, the social services and volunteer organisations.

### **How to Register As a Patient**

If you wish to register with us, please bring in your medical card or ask the receptionist for a registration form and a medical (adult and/or child) questionnaire. Alternatively, please download a form from our website.
